

Fall 2025 Planning Guide: Software Access Without Support Tickets

Get Students Access to the Right Tools Before Fall

You've supported 1:1 devices, now ensure software access is just as seamless. This guide offers a quick review of where friction still exists.

? Quick Questions to Ask Yourself:

- ➡ Are teachers requesting apps that don't run on student devices?
- ➡ Are IT staff spending time on installs or updates?
- ➡ Do support requests spike during lab-based courses?

4 Low-Lift Improvements:

- ✓ Virtualize access with browser-based labs
- ✓ Standardize app access across devices and locations
- ✓ Reduce desktop dependence
- ✓ Trial a scalable solution with minimal lift

Try It Yourself
